OVERVIEW

NEW DEVELOPMENTS

At D23 Expo 2019, Disney Parks, Experiences and Products Chairman Bob Chapek announced the highly anticipated name of the fifth Disney Cruise Line ship, The Disney Wish. Magic will be found throughout this new ship, including the three-story atrium that will be inspired by the beauty of an enchanted fairytale. The ship's stern will feature Rapunzel and her feisty side-kick Pascal. The Disney Wish will be delivered in late 2021 and will set sail beginning in January 2022.

Disney Cruise Line guests can also look forward to a signature island experience that celebrates the spirit and culture of The Bahamas and the natural environment at a new Disney port of call, which will be located on the breathtaking island of Eleuthera at a place called Lighthouse Point. Construction at Lighthouse Point will begin only after an Environmental Impact Assessment and Environmental Management Plan are reviewed and accepted by the Government of The Bahamas and public consultation has occurred. Construction could begin in 2020 with completion in late 2022 or 2023.

COMMUNITY INVOLVEMENT

Disney Cruise Line strives to make a positive impact in the many places around the world it calls home. The cast and crew of Disney Cruise Line support numerous charitable organizations that nurture the lives of children and enrich the environment. Crew members lead reading education programs in schools, give to local animal shelters and bring Disney characters to entertain children in port communities around the globe. Disney VoluntEARS also donate their time to paint murals for hospitals and care facilities, raise funds for worldwide disaster relief efforts, and host annual shore cleanups to remove trash and debris from fragile coastlines. Each year, cast and crew members donate thousands of hours of their personal time to benefit worthwhile causes in port communities around the world.

THE ENVIRONMENT

Disney Cruise Line is committed to minimizing its impact on the environment by utilizing new technologies and ongoing programs to increase fuel efficiency, reduce waste and promote conservation worldwide.

- **Reducing Plastic Waste:** In 2019, Disney Cruise Line eliminated the use of plastic straws, stirrers, and shopping bags on board as part of The Walt Disney Company's overall efforts to reduce plastic waste.
- **Environmental Officers:** All Disney Cruise Line ships have dedicated Environmental Officers who are responsible for overseeing compliance with multiple regulations and onboard environmental programs, including all shipboard recycling and sanitation efforts, as well as monitoring the ship's overall water quality and supply.
- **Recycle/Reuse:** Shipboard recycling processes annually eliminate more than 1,900 tons of metals, plastic, glass and paper from traditional waste streams since 2014. In addition, responsible construction methods have been utilized on the Disney Dream and Disney Fantasy to source flooring and carpeting that is made from sustainable, organic and recyclable alternatives.
- **Fuel Efficiency:** Disney Cruise Line was the first in the industry to utilize an innovative hull coating on the Disney Magic and Disney Wonder that is 100 percent non-toxic to the marine environment and increases fuel efficiency by reducing surface resistance in open water. The Disney Dream and Disney Fantasy have been designed to be even more hydrodynamic vessels than their predecessors, with optimized propulsion systems and hulls for increased efficiency.
- **Energy Conservation:** Condensation from the shipboard air conditioning units is reclaimed and reused to wash the decks, saving up to 30 million gallons of fresh water each year.
